

## LIST OF TABLES

Table 1.1 Advantages and limitations of statistical and machine learning methods .....	4
Table 2.1. NodeMCU ESP8266 LoLin Specification.....	17
Table 3.1 Summary of the proposed 11-features of time-domain analysis .....	34
Table 3.2 The capabilities of neural networks regarding the number of hidden layers .....	38
Table 3.3 The methods summary for determining the number of neurons .....	38
Table 4.1 Sensor's reading for 0A before calibration.....	43
Table 4.2 The reading of calibrator and current sensor for calculating gain value .....	44
Table 4.3 Calibration#1 results .....	46
Table 4.4 Calibration#2 results .....	47
Table 4.5 The results of 11 time-domain features selection using hypothesis testing.....	53
Table 4.6 The results of hyperparameter tuning in SVM algorithm .....	54
Table 4.7 The results of hyperparameter tuning in RF algorithm .....	56
Table 4.8 Comparison of the number of hidden layers and neurons in ANN training .....	58
Table 4.9 Comparison of the number of batch size in ANN modelling.....	61
Table 4.10 Classification report of SVM model.....	66
Table 4.11 Classification report of RF model .....	67
Table 4.12 Classification report of ANN model.....	69
Table 4.13. The summary of ML models' performance .....	69
Table 4.14. The summary of proposed method and previous works in RPM .....	70
