

PREFACE

Gratitude and praise because of God's blessings and grace, the author completed this Final Project entitled, “IMPLEMENTATION OF REVERSE ENGINEERING IN PRE-TREATMENT AREA FOR DESIGNING JUG CLEANING WORKSPACE” to complete the fulfilment of undergraduate studies at the Industrial Engineering Study Program, Faculty of Industrial Engineering, Telkom University. The author recognizes that completing this final report would be near impossible without the assistance and guidance of various parties. Therefore, the author would like to thank:

1. Allah SWT, that is giving smoothness and healthiness for the author to finish this final report.
2. Family, that is always supporting me for this my journey through the university, academic activities, and everything.
3. Mrs. Ilma Mufidah, S.T., M.T., Ph.D and Mrs. Dr. Ir. Sri Martini, M.T., as the final project advisors, for their direction and guidance during the work of this final project.
4. Friends, the one who support me that has given encouragement to get through together the final project from the beginning to the completion of this final project.
5. All of the employees of PT. Tirta Inverstama (AQUA) Subang that is helping the author for explaining and answering the authors question for this report for the implementation of this final project.

Furthermore, I would like to express my gratitude to anyone who indirectly assisted in the completion of this final project, as without the support, the author would not have been able to finish this report. For those who read and require this report in the future, the author hopes that this research will be helpful. Lastly, the author acknowledges that this report has a lot of shortcomings and is far from perfect. Therefore, the author hopes for criticism and suggestions from the readers for the building for evaluation and assisting the author in improving reports for another day.
