

PREFACE

Assalamualaikum warahmatullahi wabarakatuh.

Praise be to the presence of Allah SWT, Who has given favors of faith, health, resourcefulness, as well as blessings that are very abundant to this day and have made it smooth in making the Thesis **”Tabular Data to Image Conversion Method Comparison of CNN Model on Intrusion Detection System for Network Attack on Software Defined Networking”** which was prepared to meet the graduate requirements on Master of Electrical Engineering

Due to the writer’s constraints, the writer recognizes that this Thesis is still far from ideal; therefore, the writer seeks constructive feedback and recommendations for improving this thesis. As for feedback, recommendations, and inquiries, please email aryam.ibrahimy28@gmail.com.

With all modesty, the author believes that this Thesis will be beneficial to readers and academics in particular, as well as to global education as a whole. It is intended that this Thesis might be improved upon further.

Wassalamualaikum warahmatullahi wabarakatuh
