

## LIST OF FIGURES

2.1	An example of features that can be extracted from an image . . . . .	6
2.2	An example of features that can be extracted from an image . . . . .	7
2.3	An example of visual mapping result which is point cloud data. . . . .	9
2.4	An example of how depth camera determines the depth of an object it sees. . . . .	10
3.1	System hardware and software configuration . . . . .	11
3.2	System block diagram . . . . .	12
3.3	Proposed Method general flowchart . . . . .	14
3.4	Proposed extraction method . . . . .	17
3.5	Proposed memorization method . . . . .	19
3.6	Proposed Mapping Method . . . . .	20
4.1	Test condition on forward perspective, $a$ and $b$ is in the evening, $c$ and $d$ is in the morning . . . . .	26
4.2	Test condition on backward perspective, $a$ and $b$ is in the evening, $c$ and $d$ is in the morning . . . . .	27
4.3	Mapping experiment condition showing both the color stream and depth stream . . . . .	31
4.4	Experiment map result, $a$ and $b$ is in the evening, and $c$ and $d$ is in the morning . . . . .	32
4.5	Experiment map result, $a$ and $b$ is in the morning, and $c$ and $d$ is in the evening . . . . .	33
