

## DAFTAR GAMBAR

Gambar 3. 1 Overall Function BMS.....	34
Gambar 3. 2 Function Tree Battery Management System.....	35
Gambar 3. 3 Diagram Blok Level 0 Battery Management System.....	36
Gambar 3. 4 Diagram Blok Level 1 Battery Management System.....	37
Gambar 3. 5 Flowchart Level 2 Sensor Arus.....	39
Gambar 3. 6 Flowchart level 2 sensor dan Tegangan dan sensor Suhu.....	40
Gambar 3. 7 Flowchart level 2 unit charged.....	42
Gambar 3. 8 Flowchart level 2 unit kontrol.....	43
Gambar 3. 9 Flowchart level 2 passive balancing.....	45
Gambar 3. 10 Flowchart level 2 cut-off.....	46
Gambar 3. 11 Desain battery management system.....	57
Gambar 3. 12 Gantt Chart Pengerjaan 1.....	58
Gambar 3. 13 Gantt Chart Pengerjaan 2.....	59
Gambar 4. 1 Implementasi Sistem.....	61
Gambar 4. 2 Skematik Passive Balancing.....	62
Gambar 4. 3 Voltage Divider Passive Balancing.....	63
Gambar 4. 4 Source code passive balancing.....	63
Gambar 4. 5 Grafik passive balancing Idle.....	64
Gambar 4. 6 Wiring Relay Cut Off.....	67
Gambar 4. 7 Wiring Relay Cut Off.....	68
Gambar 4. 8 Tampilan pada serial monitor pengujian relay cut off.....	70
Gambar 4. 9 skematik pengujian short circuit.....	72
Gambar 4. 10 Wiring DS18B20.....	75
Gambar 4. 11 Source Code DS18B20.....	75
Gambar 4. 12 Cara kerja Iot Menggunakan Kodular.....	78
Gambar 4. 13 Wiring ESP8266.....	79
Gambar 4. 14 Skematik pengujian pemutus arus menggunakan aplikasi.....	80
Gambar 4. 15 Komunikasi Firebase dengan Kodular.....	81
Gambar 4. 16 Serial Monitor Arduino Mega.....	81
Gambar 4. 17 Serial Monitor ESP8266.....	82
Gambar 4. 18 Tampilan pada Firebase.....	82

Gambar 4. 19 Tampilan pada kodular.....	83
Gambar 4. 20 Integrasi Keseluruhan Sistem .....	87
Gambar 4. 21 Integrasi Keseluruhan Sistem (Tampak Samping) .....	87
Gambar 5. 1 Kondisi Idle Pasif Balancing .....	89
Gambar 5. 2 Kondisi Charge Pasif Balancing.....	93
Gambar 5. 3 Kondisi Discharge Pasif Balancing .....	93
Gambar 5. 4 Pengujian kondisi charge baterai dari 0% sampai 100%.....	94
