"PHOTO VISUALIZATION OF THE INFLUENCE OF ARTIFICIAL INTELLIGENCE (AI) ON ARTISTS"

This Final Assignment Report contains the positive impact of AI on artists in carrying out the creative process for artists, to let the wider public know that the impact of AI on artists is not so bad in carrying out the work or making works. The author uses digital imaging photography techniques to symbolize these anxieties through images. The author aims to provide support and hope to artists who feel they will be replaced by AI so that they don't need to feel replaced by AI, because we can collaborate with AI himself to create a work or help us find ideas for creating a work.

Keywords: Artificial Intelligence, Digital Imaging, Installation, Photography.
