

ABSTRACT

Rengga Nadif Mahendra, 1604204048, 2024, VISUALIZATION OF UNAUTHORIZED RECORDING USING MOBILE PHONE MEDIA IN PUBLIC SPACES, "Final Project: Fine Arts Study Program, Faculty of Creative Industry, Telkom University."

As humans, we always live side by side with Technology. The existence of a technological development always makes human life easier. Because it makes it easier, human personality can also change because of the development of technology. An example of a technological development is the emergence of Mobile Phones. Through Mobile Phones, there are many features that can be accessed. One of the features in our mobile phones can capture a moment by taking a video through the mobile phone camera. Of course, we must use technological developments wisely. Sadly, there are so many cases at this time in the form of unauthorized recording using mobile phone media in public spaces. The purpose of this work is to open public awareness and minds that recording carelessly without permission using a mobile phone can disturb and harm others. This work also wants to open awareness and minds for the public that maybe it has become a normal habit in the public, without realizing that there are people who feel disturbed by it, especially feeling that the recording has spread their privacy. In this context, the author wants to raise it from the perspective of people who feel disturbed by the arbitrary recording using this cellphone. The research method in the work is the field research method. When going into the field, the author found people who recorded using cellphones without permission. The reactions of the people who were recorded also felt disturbed. The conclusion of this study is that we must be aware of maintaining our privacy when in public spaces and using our cellphones wisely.

Keywords: Human Personality, Technological Development, Cellphones, Unauthorized Recording, Privacy in Public Spaces.
