ABSTRACT

During this transition, many things need to be readjusted. One of them is the introduction of the campus environment for prospective academic community. It is possible that many academicians need a miniature of the Telkom University environment due to new activities at Telkom University. This opportunity is seen and worked on by Tel-U Craft. Tel-U Craft provides miniature buildings located at Telkom University along with the interaction within. This project has been realized in the form of miniatures of several buildings, except for the Faculty of Economics and Business and the Faculty of Communication and Business. In response to this, the author made miniature buildings of the Faculty of Economics and Business and the Faculty of Communication and Business. One of the academic communities that is closely related to the building facilities of the Faculty of Economics and Business and the Faculty of Communication and Business is Capoeira Brasil Telkom University. Members of this unit will be a sample of the academic community at Telkom University. The author works on interaction using Command Blocks and combines it with the needs of UKM Capoeira Brasil Telkom University. The method used is MDLC (Multimedia Development Life Cycle) and plug in WorldEdit.

Keywords: Minecraft, Capoeira, Command Blocks.
