# PREFACE

First and foremost, we express our deepest gratitude to God Almighty for His endless blessings and grace, which have enabled us to complete this thesis titled "Analysis of Personality Through Social Media Based on Machine Learning" successfully and on time. This thesis is prepared as a requirement for obtaining the bachelor's degree and completing our studies in the S1 Telecommunication Engineering program at Telkom University, Bandung.

The selection of this topic is motivated by the increasing relevance of social media in understanding and analyzing personality traits. The data and insights presented aim to contribute to the field of machine learning and its application in social media analytics. I hope this capstone project will provide valuable contributions to both academic research and practical applications in this area.

We acknowledge that this thesis has its limitations and that our knowledge in this field is still developing. Therefore, we welcome any constructive feedback and suggestions for improving this work. Finally, we would like to extend my sincere thanks to everyone who supported us throughout the preparation of this thesis and apologize for any errors or shortcomings. We hope this research will be beneficial to readers, the academic community, and practitioners in the field of machine learning and social media analysis.

Bandung,   August 2024
