

ABSTRACT

Web-Based Testing of the West Java Endemic Fish and Introduced Fish Information System Using the Black Box Method was created to test the West Java Endemic Fish and Introduced Fish Information System which functions for managing Fish and User data, displaying Web menus and Sub-menus, Adding Fish Articles , to giving likes and comments on Articles or information displayed on the Web. Divided into three User Access rights, namely Admin, Article Admin, and General Public. The Endemic Fish and Introduced Fish Information System assists the three User Access rights in the process of managing Fish data in the West Java region and provides easy Access to data related to Endemic Fish and Introduced Fish.

Keywords: Testing, Information System, Endemic Fish, Introduced Fish, West Java, Black Box
