

PREFACE

Alhamdulillah, the author expresses his deepest gratitude to the Creator, Allah SWT. Because of His grace and guidance, the author was able to complete the Thesis with the title “Techno-Economic Analysis and Coordination Between HTS And VHTS Satellites for The Implementation of Satellite Networks in Indonesia.” This thesis is prepared as one of the requirements to obtain a Master of Engineering degree in the Master of Electrical Engineering study program at the School of Electrical Engineering, Telkom University.

The author realizes that this thesis is still far from perfect because of the limitations that the author has. Therefore, the author expects constructive criticism and suggestions for innovation in the field of Electrical Engineering, especially Satellite Telecommunications. The author is also very open if, in the future, there are corrections that cannot be realized at this time.

With all humility, the author hopes that this final project can be developed in a better direction and be beneficial for readers, the general public, and the world of education.
