ACKNOWLEDGMENTS

This thesis is prepared with the assistance and support of all contributing elements. The author would like to convey the sincerest gratitude and thanks to:

1. To Allah SWT, the author expresses his endless gratitude for all the ease, smoothness, strength, patience, blessings, and infinite favors so that this thesis can be completed properly.
2. To my beloved mother and late father, thank you to my mother, who always gave endless support and prayed for me every time. Thank you also to my late father, who taught me the values of strength and goodness, inspiring me to continue to strive to be a better person. As my siblings, Kak Rani, Bang Zaki, and Fania always supported me during this journey until this thesis was completed.
3. To my two supervisors, Mr. Dr. Ir. Heroe Wijanto, M.T., as supervisor 1, and Mr. Dr. Ir. Meiditomo Sutyarjoko, M.Sc., as supervisor 2, the author expresses his deepest gratitude for the time, knowledge, guidance, and valuable input given during the process of writing this thesis. May you always be healthy and all your affairs be smooth, and you will always be given blessings of fortune.
4. To Kak Ida, Kak Vi, Kinan, Astika, Kayla, Archie, and Zhafira, as older siblings and comrades who have provided a lot of help, support, knowledge, and meaningful presence so that the author can complete this thesis well.
5. To the Nanosatellite Laboratory, thank you for the meaningful assistance in supporting the smooth running of this research simulation.
6. To the Ailo Laboratory, thank you very much for your assistance in borrowing the server, which greatly assisted in implementing additional combination simulations in this study.
7. To all lecturers and employees of Telkom University, thank you for the knowledge and assistance that helped the author complete this thesis.
8. To myself, thank you for enduring, struggling, and working hard to complete this thesis well. The knowledge gained can provide benefits to many parties.
