

## DAFTAR GAMBAR

|                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------|----|
| Gambar II-1 Contoh gambar MRI pada arah yaitu <i>axial</i> , <i>coronal</i> , dan <i>sagittal</i> (Iacono et al., 2015) ..... | 10 |
| Gambar II-2 <i>Convolution Neural Network Architecture</i> (Habib Afridi et al., 2020) .....                                  | 12 |
| Gambar II-3 <i>Residual Network Architecture</i> (Cai et al., n.d.) .....                                                     | 13 |
| Gambar II-4 Alur kerja <i>residual block</i> (K. He et al., 2015).....                                                        | 13 |
| Gambar II-5 <b>Kiri:</b> Arsitektur Faster-RCNN <b>Kanan:</b> RPN (Ren et al., 2015) .....                                    | 14 |
| Gambar III-1 Diagram Alur Penelitian .....                                                                                    | 18 |
| Gambar III-2 Alur Perancangan System.....                                                                                     | 19 |
| Gambar III-3 Sistem deteksi Tumor Otak.....                                                                                   | 19 |
| Gambar III-4 Diagram Tahapan pre-processing .....                                                                             | 21 |
| Gambar III-5 Contoh rancangan desain arsitektur CNN dengan <i>residual block</i> dan <i>Region Proposal Network</i> .....     | 22 |
| Gambar III-6 Struktur <i>Residual Block</i> .....                                                                             | 22 |
| Gambar III-7 Contoh deteksi objek tumor.....                                                                                  | 23 |
| Gambar III-8 Tampilan GUI ketika terdeteksi tumor .....                                                                       | 25 |
| Gambar III-9 Tampilan GUI ketika tidak terdeteksi tumor .....                                                                 | 25 |
| Gambar IV-1 Dataset Citra MRI <i>T2-Weight Axial</i> .....                                                                    | 27 |
| Gambar IV-2 <i>Left: Raw MRI Image Right: Contrast Adjusted MRI Image</i> .....                                               | 28 |
| Gambar IV-3 Example of anotation process.....                                                                                 | 28 |
| Gambar IV-4 <i>Resize images into 224x224</i> .....                                                                           | 29 |
| Gambar IV-5 Dataset split ratio .....                                                                                         | 30 |
| Gambar IV-6 Halaman input Gambar MRI .....                                                                                    | 32 |
| Gambar IV-7 Contoh GUI ketika upload gambar.....                                                                              | 33 |
| Gambar IV-8 Contoh Output GUI deteksi tumor .....                                                                             | 33 |
| Gambar IV-9 Grafik Batch Loss.....                                                                                            | 34 |
| Gambar IV-10 Grafik Train loss.....                                                                                           | 35 |
| Gambar IV-11 Grafik loss validasi dan akurasi validasi .....                                                                  | 36 |
| Gambar IV-12 <i>Training Loss Object Detection Model</i> .....                                                                | 38 |
| Gambar IV-13 <i>Objek Detection Model IoU Evaluation</i> .....                                                                | 39 |

|                                                     |    |
|-----------------------------------------------------|----|
| Gambar IV-14 Contoh Deteksi yang buruk .....        | 39 |
| Gambar IV-15 Contoh gambar deteksi yang benar ..... | 40 |
