

ACKNOWLEDGMENT

All praise and gratitude are due to the Almighty God, whose blessings and guidance have enabled the author to complete this paper successfully. The author acknowledges that the completion of this work would not have been possible without the support and contributions of various individuals and institutions. Therefore, the author would like to express sincere appreciation to the following:

1. The author's parents, for their unconditional support and encouragement in all aspects.
2. Mr. Dhoni Putra Setiawan, S.T., M.T., Ph.D., the primary academic advisor, for his invaluable guidance and support throughout the development of the software design, ensuring its successful implementation.
3. Mr. Edwar, S.T., M.T., the secondary academic advisor, for his assistance and constructive input during the software development process.
4. Ms. Retno Hendryanti, Ph. D., as the academic advisor of TT-45-INT, for her continuous attention and support throughout the author's academic journey.
5. Mr. Dr. Rustam, S.Si., M.Si., as the academic advisor of TT-45-05, for her continuous attention and support throughout the author's academic journey.
6. Friends from TT-45-INT and TT-45-05, who have supported the author in various ways and were always ready to motivate the author during difficult times.
7. Fellow students at the Satellite Communication System Laboratory, who have provided great motivation and given much encouragement and support to the author.

The author realizes that this paper still has shortcomings and is far from perfect or ideal. Therefore, we welcome all constructive criticism and suggestions in order to further improve this paper. We hope that this paper will be beneficial to fellow students and readers, as well as to the wider community.
