

ACKNOWLEDGEMENTS

For all the prayers, guidance, and positive support that have been given to the author with sincerity, the author would like to express his gratitude to:

1. Allah SWT, the One and Only God, who has given the gift of health, opportunity, and long life so that the author can complete this Final Project from start to finish. May peace and blessings be upon Prophet Muhammad SAW, who guided us from the age of ignorance to the era of knowledge we live in today.
2. The author's parents, who have raised and nurtured the author with love and care, consistently providing both material and emotional support, enabling the author to maintain the strength and motivation needed to complete this Final Project.
3. The author's first supervisor, Mr. Suryo Adhi Wibowo, Ph.D., for all the support, guidance, assistance, and knowledge that has been provided, the benefits of which cannot be measured. Thank you for taking the time to guide the author from start to finish.
4. The author's second supervisor, Prof. Dr. Andry Alamsyah, for all the support, guidance, and assistance provided. Thank you for taking the time to guide the author from start to finish.
5. All lecturers of the Master's Program in Electrical Engineering, whom the author cannot mention one by one, thank you for providing useful knowledge all this time.
6. The author's friends, who have struggled together to reach this point, who have always been loyal in helping when there are difficulties, and who have always been kind to the author. Thank you to all of you; the author will always remember your kindness.
