

LIST OF FIGURES

Figure II.1 Antenna Polarization Diagram (left: linear, middle: elliptic, right: circular)	13
Figure II.2 Microstrip Antennas Structure for Circular	14
Figure II.3 Square Patch Microstrip Structures	14
Figure II.4 MIMO Scheme for 4x4 Antennas	15
Figure III.1 Flowchart Framework.....	25
Figure III.2 Circular Patch Microstrip Antenna (Plain Model)	30
Figure III.3 Circular Patch Microstrip Antenna with slot Model	32
Figure III.4 MIMO Scheme for 4x4 Antennas	33
Figure III.5 Proposed MIMO Antenna Model	34
Figure IV.1 Design of Single Circular Patch Antenna by Plain Model in (a) Front View and (b) Perspective View.....	36
Figure IV.2 Return Loss for Single Circular Patch Plain Antenna	37
Figure IV.3 Radiation Pattern of Single Circular Patch Plain Antenna	38
Figure IV.4 Design of Single Circular Patch Antenna by Cross Slot 0.1 mm Model in (a) Front View and (b) Perspective View	38
Figure IV.5 Return Loss for Single Circular Patch Antenna with slot size of 0.1 mm.....	39
Figure IV.6 Radiation Pattern of Single Circular Patch Antenna with slot size of 0.1 mm.....	40
Figure IV.7 Design of Single Circular Patch Antenna by Cross Slot 0.254 mm Model in (a) Front View and (b) Perspective View	41
Figure IV.8 Return Loss for Single Circular Patch Antenna with slot size of 0.254 mm.....	41
Figure IV.9 Radiation Pattern of Single Circular Patch Antenna with slot size of 0.254 mm.....	42
Figure IV.10 Design of MIMO Antenna in (a) Top View and (b) Back View.....	43
Figure IV.11 Fabricated MIMO Antenna in (a) Top View and (b) Back View ...	43
Figure IV.12 Simulated S-Parameter with 0.254 mm cross-slotted (Return Loss)45	
Figure IV.13 Simulated S-Parameter with 0.254 mm cross-slotted (Return Loss)46	
Figure IV.14 Simulated Mutual Coupling with 0.1 mm cross-slotted.....	47
Figure IV.15 Simulated Mutual Coupling with 0.254 mm cross-slotted.....	48
Figure IV.16 Simulated Reference Impedance	50
Figure IV.17 Simulated Envelope Correlation Coefficient (ECC) with 0.1 mm cross-slotted.....	51
Figure IV.18 Simulated Envelope Correlation Coefficient (ECC) with 0.254 mm cross-slotted.....	52
Figure IV.19 Simulated Diversity Gain (DG) with 0.1 mm cross-slotted	53

Figure IV.20 Simulated Diversity Gain (DG) with 0.254 mm cross-slotted	54
Figure IV.21 Simulated of (a) Radiation Pattern and (b) Axial Ratio	55
Figure IV.22 Examination of Return Loss Antenna 1 to 4 (0.254 mm cross-slotted).....	58
Figure IV.23 Examination of Return Loss Antenna 5 to 8 (0.254 mm cross-slotted).....	59
Figure IV.24 Examination of Return Loss Antenna 9 to 12 (0.254 mm cross-slotted).....	61
Figure IV.25 Examination of Return Loss Antenna 13 to 16 (0.254 mm cross-slotted).....	62
Figure IV.26 Examination of Mutual Coupling Antenna 1 to 5 (0.254 mm cross-slotted).....	66
Figure IV.27 Examination of Mutual Coupling Antenna 5 to 9 (0.254 mm cross-slotted).....	67
Figure IV.28 Examination of Mutual Coupling Antenna 9 to 13 (0.254 mm cross-slotted).....	68
Figure IV.29 Examination of Mutual Coupling Antenna 5 to 9 (0.254 mm cross-slotted).....	69
Figure IV.30 Examination of Envelope Correlation Coefficient Antenna 1 to 9 (0.254 mm cross-slotted).....	70
Figure IV.31 Examination of Envelope Correlation Coefficient Antenna 9 to 16, 1 (0.254 mm cross-slotted).....	71
Figure IV.32 Examination of Diversity Gain Antenna 1 to 9 (0.254 mm cross-slotted).....	72
Figure IV.33 Examination of Diversity Gain Antenna 9 to 16, 1 (0.254 mm cross-slotted).....	72
Figure IV.34 Measurement of Radiation Pattern	73
Figure V.1 Single Design Antenna Comparison.....	76
