

PERANCANGAN PUSAT KOMUNITAS SENI TARI MODERN DI BANDUNG DENGAN PEDENKATAN AKTIVITAS KOMUNITAS

ABSTRAK

Modern dance is a form of performing art that has rapidly grown among youth, especially in the city of Bandung. Modern dance communities have become more active and diverse, yet there is still a lack of dedicated spaces that accommodate their various activities—ranging from practice and performances to other creative processes. These activities not only involve dance movement, but also serve as a medium for social interaction, collaboration, and personal development.

Based on the analysis, the design of the Modern Dance Community Center in Bandung applies an activity-based approach to support these community practices. The facilities are designed to be flexible and functional, accommodating training, evaluation, and performance activities. This project aims to create a space that fulfills functional needs while also strengthening social bonds among community members.
