

DEVELOPMENT DESIGN OF GARUT PUBLIC LIBRARY WITH A UNIVERSAL DESIGN APPROACH

ABSTRACT

Abstract : The expansion plan of Garut Public Library building by DISPUSIP Garut is to accommodate activities and improve visitor comfort. As a public facility, the library should be able to be enjoyed by every community. The diversity among human being results differentiation in visitor needs, making it a challenge for the library to facilitate it. Through the data collection and analysis design method, this design is carried out by applying a universal design approach that aims to create a public library that is friendly to all levels of users and can provide optimal service to visitors. So that the community can have a library as a public space that can be enjoyed by the entire community without limitations.
