

ABSTRACT

English is one of foreign languages in the educational curriculum and should be studied by all students in Indonesia, included elementary school. Recently, English is also used as the medium of instruction in sereal elementary school aerogs Indonesia. Given the importance of English in education and the world of work, the authors wanted to create a web tutorial to Introduce English to elementary school student. This web tutorial serves to introduce English vocabulary to student of 1st grade of elementary schoo.

This Final Project focused on web interface that comes with animation to make the web become more attractive, so that student become more interested in studying English. Animations, both in the form of images and texts are created using Adobe Flash software. Hopefully, this tutorial website can attract student to learn English in a more fun.

After testing and implementating, the web interface, the conclusions are: Web tutorial of introduction of English to elementary school student is beneficial for elementary school student. Related to user friendly, the scale of 7,63 is obtained for users. For the operation of web, the scale of 7,56 is obtained for users. On the others hand, for completeness of features, the scale of 7,43 is obtained for users.

Keywords: Web tutorials, English, Animation.
