

ABSTRACT

Unit Minang culture art is a set of IT among students in Telkom, which serves as a gathering place of the set of students to learn and develop the traditional culture of indigenous minang Kabau. UKM USBM IT Telkom usually often a gathering place for fellow students who want to learn and develop Kabau Minang culture, other than that UKM USBM IT Telkom also often hold events, major events in each year, such as UKM USBM Anniversary events, and events UKM USBM PAB.

In the procurement of events and event Dies Natalies there PAB stages, the stages that must be done by the candidate committee, such as form filling, determine the interview schedule, and find out who the committee. From all stages are used in ways that are still manually, as well as the process of booking a dance that way orderin still use manual way.

Therefore, the required application of alternative solutions to overcome some of the above problems with not ruled out in terms of quality. Applications that run on-line and computerized well.

This final project will be made using waterfall method and in implentation with the programming language PHP using MySQL database and other supporting software.

Key words : *Kepanitiaan, Pemesanan Performance, UKM USBM IT Telkom, Waterfall, PHP, Database Mysql.*
