

ABSTRACT

SMA Negeri 1 Margahayu is a high school located in Bandung Regency. Management of personnel administration in SMA Negeri 1 Margahayu still using *Microsoft Excel*. This leads to frequent occurrence of disintegration of the data, so it is less effective and efficient, especially in terms of time and effort.

Therefore, SMA Negeri 1 Margahayu need applications that can assist in the management of personnel administration. Application of Personnel administration is made in hopes of helping Staff Personnel in charge of managing personnel data. Moreover, it can provide information on personnel data to other users who need the information.

This Application built with the implementation of MVC Concept that is expected to ease in further development. This application will be built using PHP programming language with Codeigniter framework and MySQL as database.

Keyword : Personnel, Administration ,MVC, Codeigniter
